

Case, Bronto Skylift aerial platforms/cranes

- cranes with high reliability requirements for fire protection, construction etc use
- continuous aftersales is critical in business model
- GSM-modems integrated into crane controller CPU
- sending operational information, allowing remote configuring etc

- service centre in Finland handling moving cranes in Europe, Australia etc on real time basis
- allowing customer guidance

- Bronto cranes in Athens Olympics 2004:
using GSM-Controller PLCs for local automation in each crane

ATHENS 2004
